

NBBO is for Retail: Get YOUR Quantity!

Although the value of discovering latent liquidity is greatest in the least active stocks, it should not be overlooked in large caps. As seen in this example of a \$3M+ trade PFE printed just one tick outside of a thin NBBO, CODA's unique multi-lateral auction facility allows liquidity seekers to safely discover what they need on their own terms. Offering down an extra penny on a \$40 stock to capture 50 times the lit bid size, with virtually no impact? That's CODA!
